

Installation Instructions

Removing the factory air cleaner assembly

If you have an after market cold air intake, refer to manufactures instructions for removal.

Engage the emergency brake and open the hood.

Remove the 2 10mm bolts from the inter-cooler cover.

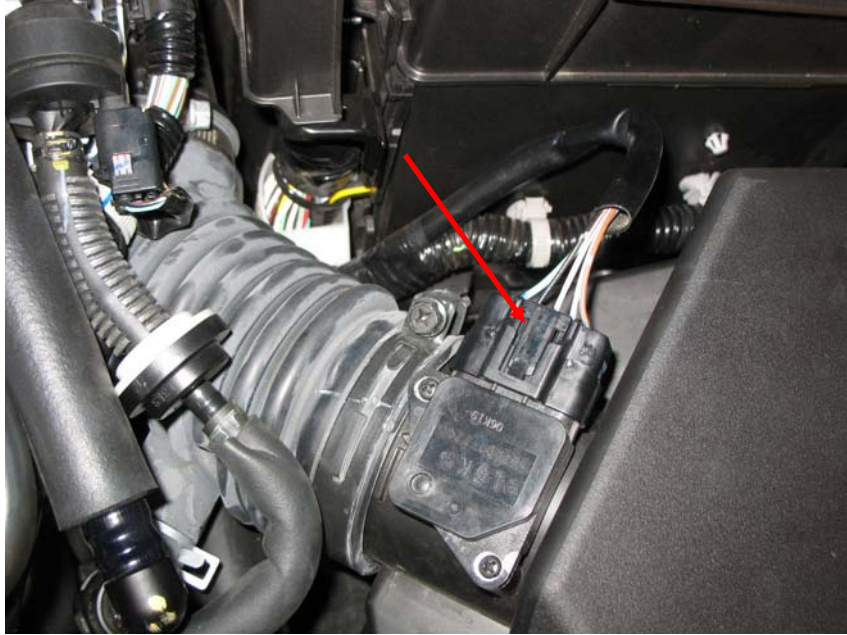

Slide the cover towards the back of the car and lift off.

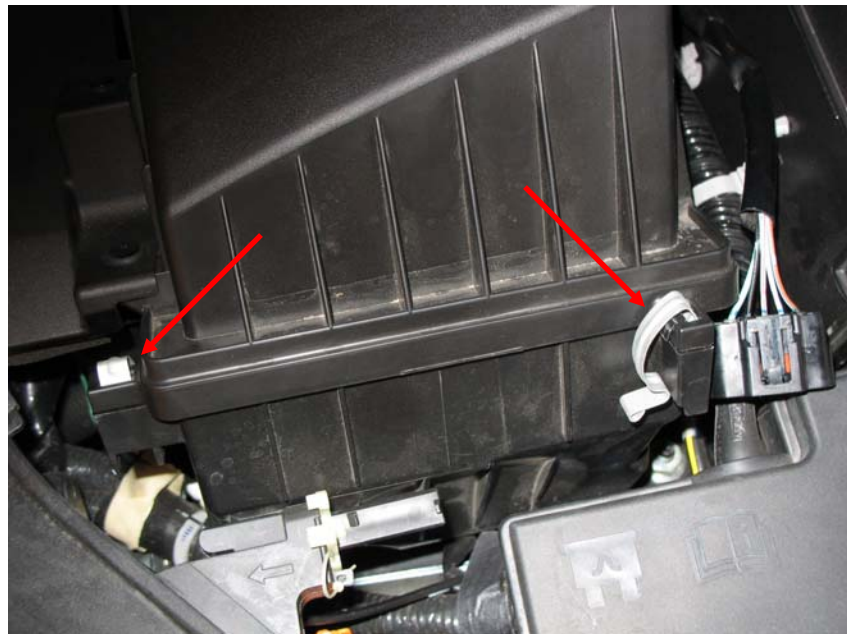

Loosen the 10mm bolt on the hose clamp of the intake.

Unclip the MAF sensor connector by pushing down on the back of the connector and pulling towards the back of the car.

Unclip the 2 hold downs for the air filter cover.

Pull the air filter cover up and towards the driver's side of the car while removing the intake hose from the cover.

Remove the air filter.

Remove this retaining clip that holds the bottom half of the air cleaner box by squeezing the clip and pulling up.

Slide the rubber grommet towards the back of the car.

Remove the rubber hold down.

Pull up on the bottom half of the air cleaner box and remove from the car.

Installing your new Short Shifter Plate

Remove the 2 12mm bolts and the factory shifter weight.

Using a 9mm open-ended wrench, slip it under the shifter cable end and pry up to pop the cable off the existing ball stud.

Place the Short Shifter plate in position.

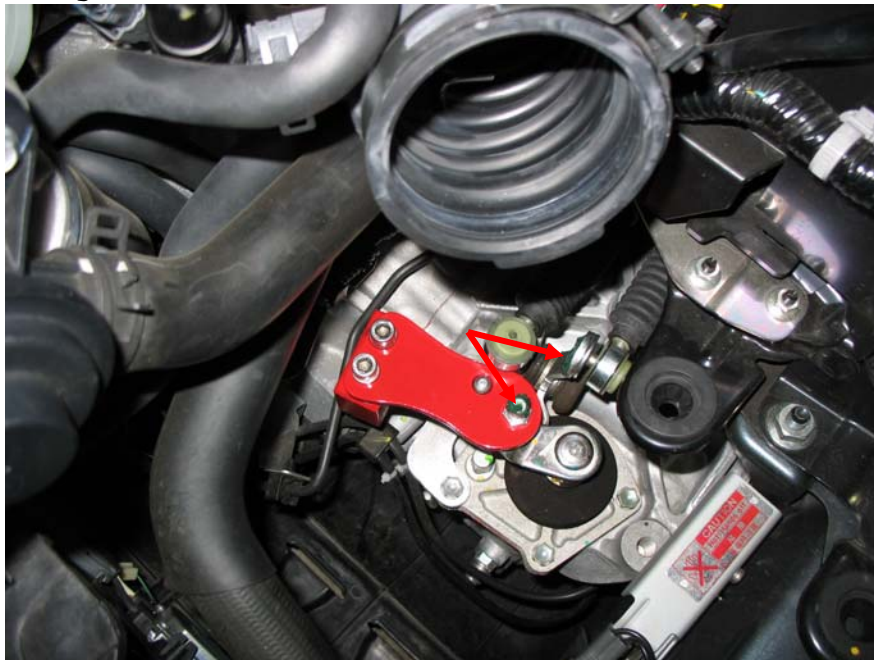

Place 1 lock washer on each 8mm hex cap bolts.

Put 2 drops of Loctite 262 Thread Locker on each of the bolts and install with the new weight using a 6mm allen wrench.

It should now look like this:

Apply grease to the top of the new ball stud and to the side of the shifter linkage.

Now center the shifter cable you previously removed over the new ball stud and press down until you here it snap in to place.

Now re-install the factory air cleaner assembly and inter-cooler cover.

Make sure you properly connect the intake hose to the top half of the air cleaner cover and don't forget to reconnect the MAF sensor.
